In 1930, Bob Brown predicted that the printed book was bound for obsolescence. The time has come, he insisted, to rid the reader of the cumbersome book. He invented a machine that would allow one to read books and any text extremely fast and in a hyper abbreviated form. He called these abbreviated texts, with em dashes replacing words: readies. He envisioned sending the condensed texts through wireless networks. The Readies, describes these eponymously named abbreviated texts and his plans for a reading machine, but since he printed only 150 copies, the volume is practically unknown outside of a small circle of scholars. With this new edition, Craig Saper hopes to introduce Bob Brown's Roving Eye Press books to a new generation of readers.

Книга составлена из текстов статей, опубликованных автором в 2010-е годы в журналах ПОЛИТЭКС (СПбГУ, Санкт-Петербург), Геополитика и безопасность (БГТУ, Санкт-Петербург), Пространство и Время (Москва), Вестник МГОУ (Москва), Известия УрФУ (Екатеринбург).
