17.2 Evolution

as Genetic

Change in

Populations.

Natural

selection on

single-gene

traits can lead

Online Library

17 2 Evolution

to changes in allele frequencies and, thus, to changes in phenotype frequencies.

Natural selection on polygenic traits can affect the relative fitness of phenotypes and thereby produce one of

Online Library

17 2 Evolution

three types of selection:
directional selection,
stabilizing selection, or
disruptive selection.
