Dynamic positioning (DP) enables a vessel to maintain a predetermined heading and position, fixed or moving, by use of propulsion units to counteract the effects of displacing forces such as wind, current, and wave action. This technique allows the ship's position and orientation to be safely and efficiently controlled during both routine and ...

knowledge of the concepts and understanding of the dynamic positioning (DP) system from the systems perspective. This book illustrates the system, subsystems and components of the DP system to better tackle maintenance, problems and breakdowns, leading to an increased mean time between failures and effective fault finding on dynamic positioning DP-related equipment. Overall, this text will help professionals reduce downtime and higher repair costs. Aimed at onboard electrical engineers, engine room watch officers, chief engineers, DP professionals onboard, in onshore officers and those taking DP training courses, this book: Explains automation and its application in the DP system Describes environmental sensors and position reference sensors as important inputs to the DP system Includes chapters on power management

What makes a “good” manager? This is a book by a manager about managers but it is not just for managers. It is for anyone and for everyone who is interested in the way people – and not just managers - behave and function around the world. Based on actual experience the title “Essence of a Manager” is a succinct

distillation of what this book is about. It is not a management manual and yet it is a map for navigation and a guide for behavior which can be valuable for practicing managers at all levels. It formulates a sound thesis to describe the qualities needed in a “good” manager and builds up from elemental qualities to develop a holistic view of a good manager. Nine fundamental attributes are proposed as being necessary and sufficient to describe a “good” manager. It is applied management philosophy for a thinking manager and deals with the fundamental drivers which lie deeper than language or culture and which control human behavior.

its nuclear power plants to the United States. Frédéric Pierucci, former senior executive of one of Alstom's power company subsidiaries, found himself at the heart of this state scandal. His story goes to the very core of how he plotted the key features of the secret economic war that the United States is waging in Europe. And after being silenced for a long time, he has decided, with the help of journalist Matthieu Aron, to reveal all. In April 2013, Frédéric Pierucci was arrested in New York by the FBI and accused of bribery. The US authorities imprisoned him for more than two years - including fourteen months in a notorious maximum-security prison. In doing so, they forced Alstom to pay the biggest financial penalty ever imposed by the United States. In the end, Alstom also gave up areas of control to General Electric, its biggest American competitor. Frédéric's story unpacks how
