Buying New vs. Used. One way to get closer to the convertible of your dreams (or other higher-end car) is to take a look at used cars. An older car with low mileage may be hard to find, but can be a great deal. Another benefit of buying a used car, especially if you are a new driver, is that the car will likely already have a few dings and dents.

All modern car tires are now radial. Car tires are a tremendous blight on the environment, and there are about a billion car tires stockpiled in our country. Re-treaded passenger car tires are manufactured according to standards. Today's passenger-car tires are safer at much higher speeds than 80 mph. While passenger-car tires are nearly all radials these days, ST tires are still available in bias-belted construction. We all know that our car tires are filled with air and that at certain times the air pressure in them decreases. The sport car tires are built to provide excellent traction and handling. Discover everything you need to know by grabbing a copy of this ebook today.

You know that if you want your car to run smoothly, you have to keep up with the mandatory maintenance. Check the oil every so often, inspect the tires for pressure and wear, get them rotated if they need it, lubricate the locks, and keep up with your car-wash dates. And if you really want to take care of it, have the proper rags and tools on hand to clean off any sudden dirt or fingerprints. "The Feder Guide to Where to Park Your Car in Manhattan (and Where Not to Park It!!)" has been designed to make it easier for readers to park their vehicles in Manhattan (NY). This first edition covers Downtown Manhattan - 30th Street down to Battery Park. A Midtown/Uptown edition will follow in the next six months.The book has 3 main parts to it: a helpful hints section, listings of the street parking regulations and listings of parking garages/lots. The book will also have maps of the sections of Manhattan that are covered.The helpful hints section is pretty much what it sounds like ? what to do if you get a ticket, if you're towed, what to watch out for, etc. The listings of the street parking regulations does just that - lists the complete street parking regulations for every street in the book. When a particular street is generally a great place to park, a smiley face has been placed next to the listing to indicate to readers that they are usually safe to park there. If a particular street is a terrible place to park, a frowney face has been placed there to alert the readers to avoid that street.The parking garage section will list the locations, hours, contact info, rates, etc., for participating garages in Manhattan. All the big firms who run parking facilities in Manhattan have agreed to participate and some of the smaller firms are also participating. We've done our research on this topic. For instance, in the year in 2000, an average of 22,000 parking tickets a day were written in NYC, of which Manhattan was by far the largest contributor. As noted on the back cover of the book: if by using our guide a reader saves themselves from getting just one parking ticket, our book will pay for itself up to 7 times over. It pays for itself 14 times over if they save themselves from being towed. We have a marketing plan in place with a focus on prepublication promotion, extensive ARC distribution for obtaining reviews, online promotion, publicity to include TV and radio satellite interviews, scheduling speaking engagements and targeting places that car enthusiasts shop including auto parts stores, AAA, rental car outlets as well as trucking and moving companies.

An Electric Car is often referred to as an electric vehicle or EV. In Select Your Electric Car, I explore the various options of EVs available in the United States. If you live in California or in one of the other states which have similar zero emission vehicle standards, you will have more choices. These states have laws that car companies selling cars in their state must provide a certain percentage of EVs. I am going to focus on the EVs which are widely available in the US now (2018). I'll compare them, so that hopefully you will be able to purchase the EV which fits your lifestyle - or the lifestyle which you plan to adopt once you own an EV. I'll also look at a few other EVs which are not as widely available. In 2019, car dealers will be offering more models of EVs nationally, at least that's the plan. I'm thinking that you might want a car with more of a track record. So I won't be saying as much about those models, though I will mention them. The US ranks seventh in number of EVs sold, following China, United Kingdom, France, Sweden, Netherlands, and Norway who is at #1. If you wanted to wait until 2019 to drive your EV, and you had \$200,000 (\$200K) to spare, and you had a Commercial Driver's License (CDL) or could hire a driver who did; why not just purchase a Tesla Electric Semi. After all, Elon Musk is now saying it will have a 600-mile range. Even if he's only 75% correct, that's still a 450-mile range. I could drive into town (Olympia) every day of the week and up to the big city (Seattle) on the weekend. And I still wouldn't have to charge my rig. And in Aug 2018, a Tesla Semi made it from Coast to Coast across the US. It did have to be recharged. But the driver was able to find charging stations which were powerful enough to charge it. But where would I park the thing? Besides I don't have a CDL. And the few people I know who do aren't interested in being my personal chauffeur. I also definitely don't have \$200K that I can afford to spend on my next vehicle. I won't talk about the Tesla Semi in this book. You can read about that vehicle in my book - The Hybrid Vehicle. I'll also mention techniques for driving an EV which will expand their range. At least these techniques work when driving my 2015 Electric Nissan Leaf.
