Heating Heat pump technology has been used around the world for decades and Mitsubishi Electric have developed this technology to produce Ecodan - one of the most advanced, efficient renewable heating systems available today. Make an Enquiry Read our Heating blogs

Ecodan Renewable & Energy Efficient Heating Systems ...

The Ecodan is a domestic air source heat pump produced by Mitsubishi Electric. The Ecodan range comprises four models: 5 kW single phase, 8.5 kW single phase, 14 kW single phase and 14 kW three phase. The Ecodan utilises a refrigeration circuit with a compressor and condenser and uses inverter-driven - as opposed to fixed-speed - technology.

Ecodan provides your home with continuous hot water via a dedicated “all-in-one” Ecodan Hot Water Storage System. These storage systems are specifically designed to integrate with the Ecodan outdoor unit. Alternatively, the Ecodan outdoor unit can also be connected up to an existing hot water cylinder via the Ecodan Hydrobox module.

How does it work? // Mitsubishi Electric

Ecodan Air Source Heat Pumps Renewable Heating Technology By simply using a Mitsubishi Electric Ecodan air source heat pump to provide domestic space heating and hot water, it is possible to greatly reduce CO2 emissions and your home’s running costs.

Ecodan Heating / Mitsubishi Electric Ireland

It harvests renewable, low grade energy from the outdoor air and upgrades this into useful heat to supply a home with hot water and heating. For every 1kW of electricity fed into Ecodan, you will get at least 3kW of heating energy. Page 5: Maintenance Please consult the heating system installers as to any recommended maintenance requirements.
