An exploration of animal spirituality and the ability of animals to communicate with humans even in the afterlife • Chronicles the author ´ s profound relationship with her dog, Brio, his ability to read her mind and emotions, and the messages she received from him after his death • Shares the author ´ s research with animal communicators, psychics, and scientists specializing in animal intelligence such as Rupert Sheldrake • Explores animals ´ thoughts and feelings, interspecies communication and telepathy, animal souls and the afterlife, and animal reincarnation • Paper with French flaps Looking for companionship after a near-fatal car crash, Elena Mannes, an award-winning television journalist and producer, decided to get her first dog. But what she found with her dog Brio shook the foundations of her physical and spiritual worlds, sending her on a quest to discover the nature of his spiritual origins and to contemplate and seek out the possibility of interspecies communication--even after death. Soon after bringing her puppy home, Mannes realized that the master-companion relationship would not be possible with Brio, who quickly showed that he had a mind--and a spirit--of his own. A healer Mannes visited immediately focused on Brio, exclaiming that he was an old soul. Mannes ´ s growing curiosity about the intelligence, emotions, and consciousness of Brio and other dogs led her to contact an animal psychic in California who described, with amazing accuracy, Brio ´ s favorite walks and the author ´ s apartment from the dog ´ s point of view. Motivated by her experience, Mannes produced a filmed segment with Diane Sawyer featuring the same psychic, who described Sawyer ´ s country house and her dog ´ s favorite spots in the yard. Mannes ´ s skeptical journalist background compelled her to investigate further. She delved into the world of animal communicators, psychics, and scientists studying animal intelligence, including Rupert Sheldrake, to find answers to her multiplying questions: Do animals have thoughts and feelings? Consciousness? Souls? Is interspecies communication possible? Can animals reincarnate? Spanning the entire life and afterlife of Brio, including his last days and his messages to the author after he passed on, this book also explores Mannes ´ investigations into the spiritual life of animals, offering a new understanding of the unbreakable bond between humans and animals. Mannes invites readers to move beyond the owner-pet relationship and shows us how to see animals as thinking, feeling, spiritual beings whose connections with us extend far beyond life and death.

Is it still possible to fake your own death in the twenty-first century? With six figures of student loan debt, Elizabeth Greenwood was tempted to find out. So off she sets on a darkly comic foray into the world of death fraud, where for \$30,000 a consultant can make you disappear--but your suspicious insurance company might hire a private detective to dig up your coffin...only to find it filled with rocks. Greenwood tracks down a British man who staged a kayaking accident and then returned to live in his own house while all his neighbors thought he was dead. She takes a call from Michael Jackson (no, he's not dead--or so her new acquaintances would have her believe), stalks message boards for people contemplating pseudocide, and gathers intel on black market morgues in the Philippines, where she may or may not obtain some fraudulent goodies of her own. Along the way, she learns that love is a much less common motive than money, and that making your death look like a drowning virtually guarantees that you'll be caught. (Disappearing while hiking, however, is a way great to go.) Playing Dead is a charmingly bizarre investigation in the vein of Jon Ronson and Mary Roach into our all-too-human desire to escape from the lives we lead, and the men and women desperate enough to give up their lives--and their families--to start again. "Delivers all the lo-fi spy shenanigans and caught-red-handed schadenfreude you're hoping for." --NPR "A lively romp." --The Boston Globe "Grim fun." --The New York Times "Brilliant topic, absorbing book." --The Seattle Times "The most literally escapist summer read you could hope for." --The Paris Review

The Harvard-educated physician and New York Times bestselling author of The Hormone Cure shows you how to grow new receptors for your seven metabolic hormones, making you lose weight and feel great fast! When it comes to weight loss, most people don ´ t think about hormones. But when you develop resistance to your seven major metabolic hormones—cortisol, thyroid, testosterone, growth hormone, leptin, insulin, and estrogen—your body adjusts by increasingly raising your hormone levels and ultimately slowing down your metabolism. And a slower metabolism leads to weight gain and difficulty losing weight. The solution, Dr. Sara Gottfried contends, is to reset the efficiency of your hormones by repairing and growing new hormone receptors. Based on leading scientific research, The Hormone Reset Diet is her proven weight loss and energy program to reverse hormone resistance in just three weeks. It will help you: Boost your metabolism and calorie burning by growing new and fresh thyroid receptors; Increase your weight loss by re-balancing estrogen and progesterone receptors; Reverse your aging by resetting glucocorticoid receptors (for better processing cortisol). For the last twenty years, this Harvard-MIT educated physician has helped thousands of women address the root hormonal causes of what bothers them most: excess weight, lack of energy, aging, and illness. Going beyond her bestselling The Hormone Cure, this program is the next generation of her deep understanding of hormonal optimization for rapid weight loss.

Recent large-scale corporate collapses, such as Lehman Brothers, Enron, Worldcom, and Parmalat, highlight the implosion of traditional models of fraud prevention. By focusing on risk factors at the micro level, they have failed to take into account the broader context in which external auditors operate as well as the crucial importance of such factors as corruption, organizational culture, corporate social responsibility, ethical values, governance, ineffective regulation, and a lack of transparency. Corporate Fraud and Corruption engages readers by showing how evidence-based, multi-level micro and macro analysis of fraud risk and protective factors inform effective fraud prevention, in turn minimizing financial catastrophes. Krambia-Kapardis focuses on her own empirical research into the aetiology of fraud to showcase a holistic approach to fraud prevention. This book also features major case studies from the United States, the United Kingdom, and Australia.

Surveillance presents a conundrum: how to ensure safety, stability, and efficiency while respecting privacy and individual liberty. From police officers to corporations to intelligence agencies, surveillance law is tasked with striking this difficult and delicate balance. That challenge is compounded by ever-changing technologies and evolving social norms. Following the revelations of Edward Snowden and a host of private-sector controversies, there is intense interest among policymakers, business leaders, attorneys, academics, students, and the public regarding legal, technological, and policy issues relating to surveillance. This handbook documents and organizes these conversations, bringing together some of the most thoughtful and impactful contributors to contemporary surveillance debates, policies, and practices. Its pages explore surveillance techniques and technologies; their value for law enforcement, national security, and private enterprise; their impacts on citizens and communities; and the many ways societies do - and should - regulate surveillance.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resident, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

"As women approach the age at which they stop having their monthly period, many start to experience the physical and emotional indignities of hormonal fluctuation and an ensuing "metabolic stall." The result: hot flashes, night sweats, insomnia, weight gain, memory loss or brain fog, irritability, and discomfort during sex. Many women are resigned to accept these changes now and for years to come; some even agree to be unnecessarily medicated for their symptoms. But Dr. Anna Cabeca's research and experience with thousands of her patients shows that there is a unique diet combination and non-pharmaceutical lifestyle interventions that can dramatically alleviate these symptoms--forever! Pairing the hallmarks of ketogenic eating (very low carb, high fat) with foods and lifestyle changes that bring the body's pH to an alkaline level (and lower cortisol production), The Hormone Fix offers women everywhere an easy-to-follow, easy-on-the-body program to help thrive through menopause and beyond. It includes recipes, meal plans, stress-reduction advice, testimonials from real women, and a 10-day quick start guide to help women trim down, get off of meds, get fit, tap into unexpected energy levels, enhance intimacy levels, and completely revitalize their lives"--

This book describes the importance of integration and clustering in creating sustainable economic growth. Modern economic conditions demonstrate the need for governmental stimulation of cluster initiatives in entrepreneurship, and make it necessary to study the experience of developed countries in the sphere of stimulation of cluster initiatives in entrepreneurship, and to offer recommendations for improving the system of state stimulation of these initiatives. The authors conclude that at present, innovational economy is an economic system that functions on the basis of business networks, as this model offers innovational cooperation between specialists from various scientific and technical spheres, between organizations of various sizes (large, medium, and small), and between groups of various types of companies. Cluster strategy in modern global practice is one of the most important tools of public policy for increasing the competitiveness of national economies. This means that the most competitive spheres develop on the basis of the cluster principle, and support for cluster building increases a country ´ s economic competitiveness.
