as to educational practitioners.

The topics were carefully selected to reflect issues that affect school-age children (K-12) and their learning. The text frequently provides detailed chronological examples of children's abilities both in the narrative and in

Access PDF Essing Language Production In Children Experimental Procedures

Ever since the notion of explanatory adequacy was promoted by Chomsky in his 1965 *Aspects*, linguists and psycholinguists have been in pursuit of a psychologically valid

Acces PDF Essing Language Production In

theory of grammar. To be explanatorily adequate, a theory of grammar can not only describe the general characteristics of a language but can also account for the underlying psychological processes of acquiring and processing that language. To be

Acces PDF Essing

Language Production In

Children Experimental Procedures

considered psychologically valid, a grammar must be learnable by ordinary children (the problem of acquisition) and must generate sentences that are parsable by ordinary people (the problem of processing). Ultimately, the fields of language acquisition and

Access PDF Essing Language Production In

Children Experimental Procedures
processing are concerned with the same goal: to build a theory that accounts for grammar as it is acquired by children; accessed in comprehension and production of speech; and represented within the human mind. Unfortunately, these two fields developed

Acces PDF Essing

Language Production In

Children. Experimental Procedures

independently and have rarely been well-informed about each other's concerns. Both have experienced past difficulties as a result. Recently, new models have been developed with full consideration to cross-linguistic diversity. Gone are many of the

Access PDF Essing Language Production In

Children: Experimental
Procedures

basic assumptions of conventional models, and in their place a variety of innovative and more flexible assumptions have emerged. However, in their attempt to address cross-linguistic issues, these processing models have yet to fully address

Access PDF Essing

Language Production In

the developmental challenge:

How can a child without a stable grammar process language and still manage to acquire new grammar? This book attempts to develop a model of language processing that addresses both cross-linguistic and

Acces PDF Essing Language Production In

developmental challenges. It proposes to link the setting of a basic configurational parameter during language acquisition to the different organization of processing strategies in left- and right-branching languages. Based primarily on Mazuka's doctoral

Acces PDF Essing Language Production In

dissertation, this volume
incorporates various responses to
the original proposal as well as
the author's responses to the
comments.

Acces PDF Essing Language Production In

This book focuses on the early acquisition of signed languages and the later development of reading by children who use signed languages. It represents the first collection of research papers focused solely on the acquisition of various signed

Access PDF Essing
Language Production In
Children: Experimental
Procedures

languages by very young children--all of whom are acquiring signed languages natively, from deaf parents. It is also the first collection to investigate the possible relationships between the acquisition of signed language

Acces PDF Essing

Language Production In

Children Experimental Procedures

and reading development in school-aged children. The underlying questions addressed by the chapters are how visual-gestural languages develop and whether and how visual languages can serve the foundation for learning a second

Acces PDF Essing

Language Production In

visual representation of language, namely, reading. Language Acquisition by Eye is divided into two parts, anchored in the toddler phase and the school-pupil phase. The central focus of Part I is on the earliest stages of signed language acquisition. The

Access PDF Essing

Language Production In

Children Experimental Procedures

chapters in this part address important questions as to what "babytalk" looks like in signed language and the effect it has on babies' attention, what early babbling looks like in signed language, what babies' earliest signs look like, how parents talk

Acces PDF Essing

Language Production In

to their babies in signed language to ensure that their babies "see" what's being said, and what the earliest sentences in signed languages tell us about the acquisition of grammar. With contrasting research paradigms, these chapters all show the

Acces PDF Essing Language Production In

Children Experimental
Procedures

degree to which parents and babies are highly sensitive to one another's communicative interactions in subtle and complex ways. Such observations cannot be made for spoken language acquisition because speech does not require that the

Access PDF Essing Language Production In

Children Experimental
Procedures

parent and child look at each other during communication whereas signed language does. Part II focuses on the relationship between signed language acquisition and reading development in children who are deaf. All of these chapters report

Acces PDF Essing

Language Production In

Original research that investigates and uncovers a positive relationship between the acquisition and knowledge of signed language and the development of reading skills and as a result, represents a historical first in reading research. This

Access PDF Essing

Language Production In

Children Experimental Procedures

section discusses how current theory applies to the case of deaf children's reading and presents new data that illuminates reading theory. Using a variety of research paradigms, each chapter finds a positive rather than a negative correlation between

Access PDF Essing

Language Production In

signed language knowledge and usage, and the development of reading skill. These chapters are sure to provide the foundation for new directions in reading research.

This title is a major professional

Access PDF Essing Language Production In

reference work in the field of deafness research. It covers all important aspects of deaf studies: language, social/psychological issues, neuropsychology, culture, technology, and education.
