Strength training for fat loss is a controversial topic. Lots of people out there believe that lifting weights is only useful if your goal is to build muscle and gain strength. And if you don't want to be 'big' and 'bulky' you'd be much better off doing cardio instead. To be clear, cardio can help with fat loss, but using it as a stand-alone tool for the job won't deliver ...

With a pound of fat requiring you to burn 3,500 calories, you will lose 26 pounds in a year without spending an extra minute on cardio. ([250 calories/day x 365 days/yr]/3,500 calories/pound of fat). Now as ladies, sometimes we brush off this advice because we don't want to get "big" or "bulky."

5 Full-Time Fat-Blasting Workouts: Weight Training For Fat ...

During the Performance Phase of a training cycle, when striving to maximize performance, it is beneficial to temporarily trim down to as low as 5 to 6 percent body fat for men, and 12 to 14 percent for women. (Body-fat percentage is difficult to measure in practice; therefore, find your optimal climbing weight by tracking performance.)
