Glencoe Communication Applications provides students with the communication and critical-thinking skills necessary to become competent communicators and valuable, promotable employees.

We are what we eat. That old expression seems particularly poignant every time we have our blood drawn for a routine physical to check our cholesterol levels. And, it's not just what we eat that affects our health. Whole ranges of behaviors ultimately make a difference in how we feel and how we maintain our health. Lifestyle choices have enormous impact on our health and well being. But, how do we communicate the language of good health so that it is uniformly received-and accepted-by people from different cultures and backgrounds? Take, for example, the case of a 66 year old Latina. She has been told by her doctor that she should have a mammogram. But her sense of fatalism tells her that it is better not to know if anything is wrong. To know that something is wrong will cause her distress and this may well lead to even more health problems. Before she leaves her doctor's office she has decided not to have a mammogram-that is until her doctor points out that having a mammogram is a way to take care of herself so that she can continue to take care of her family. In this way, the decision to have a mammogram feels like a positive step. Public health communicators and health professionals face dilemmas like this every day. Speaking of Health looks at the challenges of delivering important messages to different audiences. Using case studies in the areas of diabetes, mammography, and mass communication campaigns, it examines the ways in which messages must be adapted to the unique informational needs of their audiences if they are to have any real impact. Speaking of Health looks at basic theories of communication and behavior change and focuses on where they apply and where they don't. By suggesting creative strategies and guidelines for speaking to diverse audiences now and in the future, the Institute of Medicine seeks to take health communication into the 21st century. In an age where we are inundated by multiple messages every day, this book will be a critical tool for all who are interested in communicating with diverse communities about health issues.

Recent world history in a motivating format Glencoe World History: Modern Times draws on the features of Glencoe World History to motivate students, help them understand the connections between recent world events and issues, and give them an appreciation for the interconnectedness of the world's regions and peoples.

Provides teachers with classroom-proven ways to prepare students to be successful math learners by teaching the vocabulary and comprehension skills needed to understand mathematics.

Classic Grounded Theory: Applications With Qualitative and Quantitative Data provides practical " how to " guidance for doing grounded theory (GT) using the classic approach articulated by Barney Glaser. Authors Judith A. Holton and Isabelle Walsh emphasize the philosophical flexibility of classic GT as a " full package " approach that can be applied to any study and any type of data where the goal is to discover and generate a conceptually integrated theory. Drawing on the experiences of novice researchers who have participated in GT troubleshooting seminars, the book provides step-by-step guidance on undertaking a research study that stays true to the classic GT practice paradigm.

With more than 300 entries, these two volumes provide a one-stop source for a comprehensive overview of communication theory, offering current descriptions of theories as well as the background issues and concepts that comprise these theories. This is the first resource to summarize, in one place, the diversity of theory in the communication field. Key Themes Applications and Contexts Critical Orientations Cultural Orientations Cybernetic and Systems Orientations Feminist Orientations Group and Organizational Concepts Information, Media, and Communication Technology International and Global Concepts Interpersonal Concepts Non-Western Orientations Paradigms, Traditions, and Schools Philosophical Orientations Psycho-Cognitive Orientations Rhetorical Orientations Semiotic, Linguistic, and Discursive Orientations Social/Interactional Orientations Theory, Metatheory, Methodology, and Inquiry
