## Inside Learn

The Windows command line is a commonly used tool for IT support and system administration. Batch scripting is a tool for automating the command line. If you are learning one of these, it makes sense to learn both. Learn both here! In this book, you learn how to: - get information about your computer and its contents - customize the command ("cmd") window

# Access PDF Learn Command Line And Batch Script Fast Vol I A Course From The Basics Of Windows To The Edge Of

Batch Scripts are stored in simple text files containing lines with commands that get executed in sequence, one after the other. Scripting is a way by which one can alleviate this necessity by automating these command sequences in order to make one's life at the shell easier and more productive. This tutorial discusses the basic functionalities of Batch Script along with relevant examples for easy understanding.

Learn Enough Command Line to Be Dangerous  
The batch command ECHO is used for echoing commands on/off and printing message to the console. Example. @echo OFF echo Hello.

# Access PDF Learn Command Line And Batch Script Fast Vol I A Course From The

Output. Hello. This command ECHO displays Hello in the console as shown above. Besides printing message, echo is also used for deciding whether or not to display the command itself. Like in this example as well, in the first line we have turned OFF echo, which makes sure that commands themselves are not printed.

---

Batch File Commands (A-Z) | Explanation and Examples

Normally, the first line in a batch file often consists of the following command. ECHO

# Access PDF Learn Command Line And Batch Script Fast Vol I A Course From The

Command & comment;echo off By default, a batch file will display its command as it runs. The purpose of this first command is to turn off this display. The command "echo off" turns off the display for the whole script, except for the "echo off" command itself.
