Security sensitive microbes (viruses, bacteria, fungi, and parasites) and toxins, which are often referred to as the select agents and toxins, have the capacity to cause serious illness and death in humans, animals, and plants. Throughout history, these microbes and toxins have been exploited in one form or another as biowarfare and bioterror agents that create fear and panic well beyond any actual physical damages they might cause. Manual of Security Sensitive Microbes and Toxins provides comprehensive, state-of-the-art coverage of microbes and toxins of biosecurity concern. The ultimate goal is to increase our awareness of these agents and enhance our preparedness against any future bio-emergencies. The book begins with an introduction containing a brief overview of the historical aspects of security sensitive microbes and toxins. This is followed by a concise summary of the current status in relation to the regulation of security sensitive microbes and toxins and a discussion of future development trends. The book is divided into seven parts: Microbes and Toxins Affecting Humans and Animals; Viruses Microbes and Toxins Affecting Human and Animals; Bacteria Microbes and Toxins Affecting Human and Animals; Fungus and Parasite Microbes and Toxins Affecting Human and Animals; Toxins Microbes Affecting Animals; Bacteria Microbes Affecting Plants Written by experts in the relevant areas of research, the chapters are authoritative reviews, each one covering a single microbe or toxin with respect to its classification, biology, epidemiology, pathogenesis, identification, diagnosis, treatment, and prevention. The chapters also discuss the limitations of our current knowledge and challenges relating to improved detection and control of the microbe or toxin.

The 2nd edition of Catheter Ablation of Cardiac Arrhythmias, written by Shoei K. Stephen Huang, MD and Mark A. Wood, MD, provides you with the most comprehensive and detailed coverage of the latest ablation techniques, from direct-current to radiofrequency to cryotherapy. It offers the latest information on anatomy, diagnostic criteria, differential diagnosis, mapping, and the use of echocardiography to assist in accurate diagnosis and management of cardiac arrhythmias. Authored by two of the world's leading experts in catheter ablation, this text includes a unique section on troubleshooting difficult cases, and its use of tables, full-color illustrations, and high-quality figures is unmatched among publications in the field. Get the most comprehensive and detailed coverage of arrhythmias and ablation technologies, highlighted by a systematic approach to troubleshooting specific problems encountered in the laboratory 1 complete with solutions. Find the critical answers you need quickly and easily thanks to a consistent, highly user-friendly chapter format. Master each approach with exceptional visual guidance from tables, illustrations, high-quality figures. Review basic concepts and build clinical knowledge using extensive tables that present specific "hard-to-remember" numerical information used in diagnosis, and mapping to summarize key information in each chapter. Improve accuracy with assistance from advanced catheter mapping and navigation systems and use of intracardiac echocardiography to assist accurate diagnosis and ablation. Keep pace with an updated and expanded section on atrial fibrillation. Stay current on timely topics like contemporary cardiac mapping and imaging techniques, atrial tachycardia and flutter, atrial fibrillation, atrioventricular nodal reentrant tachycardia, tachycardias related to accessory atrioventricular connections, and ventricular tachycardia, transeptal catheterization, ablation for pediatric patients, and patient safety and complications.

Clinical Practice Manual for Pulmonary and Critical Care Medicine, by Judd W. Lamsberg, MD, is a unique point-of-care manual that provides essential information on managing inpatients and outpatients with common, serious respiratory and internal medicine presentation and problems. Easy-to-follow diagnostic and therapeutic algorithms are accompanied by case-based illustrations encountered on a daily basis by attendings, fellows, residents, and students. The bulleted format, concise approach, and familiar examples provide a framework for effective teaching, learning, and patient care. Identifies common but important misconceptions that are regularly encountered in pulmonary and critical care training. Uses a concise, bulleted format throughout, helping you find key information quickly. Illustrates cases with primary data such as x-rays, monitor strips, ventilator wave forms, and other familiar documentation. Helps you develop your ability to effectively explain your thought process in the clinical setting to other practitioners at the bedside. Serves as a teachers guide! for clinician educators, organizing topics in an easy to teach fashion, amenable to (chalk talks) and bedside didactics Provides focused discussions of basic physiology and pathophysiology related to pulmonary and critical care medicine.

Destaca-se por ser uma fonte de consulta rápida e prática que aborda novas terapias para uso em consultórios e no tratamento de pacientes pediátricos hospitalizados.

The HCM 2010 significantly enhances how engineers and planners assess the traffic and environmental effects of highway projects by: Providing an integrated multimodal approach to the analysis and evaluation of urban streets from the points of view of automobile drivers, transit passengers, bicyclists, and pedestrians; Addressing the proper application of microsimulation analysis and the evaluation of the results; Examining active traffic management in relation to demand and capacity; and Exploring specific tools and generalized service volume tables to assist planners in quickly sizing future facilities. The four-volume format provides information at several levels of detail, to help users more easily apply and understand the concepts, methodologies, and potential applications.

AACN Procedure Manual for Critical Care offers comprehensive coverage of procedures unique to the critical care environment. This edition is thoroughly revised, updated, and expanded to reflect the current state of critical care nursing practice. Information is presented in a highly illustrated step-by-step format with supporting rationales for each step of every procedure. This resource also emphasizes evidence-based practice and provides complete coverage of the latest clinical studies. Each procedure is organized in a consistent, step-by-step format with categories that include: prerequisite nursing knowledge, equipment, patient and family education, patient assessment and preparation, procedure, expected outcomes, unexpected outcomes, patient monitoring and care, and documentation. Each procedure is supported by research-based data. Advanced practice procedures are noted with a special AP icon indicating that these procedures should be done only by qualified personnel. 19 new procedures discuss topics such as combitube insertion and removal, transesophageal echocardiography, and patient controlled analgesia. A new Quick Tips feature - located in the Special Considerations column for quick reference - highlights key words and key concepts for each procedure. A new web-enhanced feature at the beginning and end of each procedure directs readers to online supplement materials such as additional art and photographs. Web links connect users to hundreds of continually updated web sites that contain information relevant to critical care nursing practice. 200 new line drawings clearly illustrate important techniques and bring key procedures to life.
