**Modern Compiler Implementation in Java - Andrew W. Appel -**

The compiler implemented within may compile correctly under javac, but it isn't implemented in a modular, object oriented way like one might expect when using such a language. Rather, the author seems to often use classes as little more than C structs, and methods as merely convenient ways of grouping together functions.

C++ (/ si pi s pi s/) is a general-purpose programming language created by Bjarne Stroustrup as an extension of the C programming language, or "C with Classes".The language has expanded significantly over time, and modern C++ now has object-oriented, generic, and functional features in addition to facilities for low-level memory manipulation. It is almost always ...
