The contributors to this volume theorize Asian video cultures in the context of social movements, market economies, and local popular cultures to complicate notions of the Asian experience of global media. Whether discussing video platforms in Japan and Indonesia, K-pop reception videos, amateur music videos circulated via microSD cards in India, or the censorship of Bollywood films in Nigeria, the essays trace the myriad ways Asian video reshapes media politics and aesthetic practices. While many influential commentators overlook, denounce, and trivialize Asian video, the contributors here show how it belongs to the shifting core of contemporary global media, thereby moving conversations about Asian media beyond static East-West imaginaries, residual Cold War mentalities, triumphalist declarations about resurgent Asias, and budding jingoisms. In so doing, they write Asia's vibrant media practices into the mainstream of global media and cultural theories while challenging and complicating hegemonic ideas about the global as well as digital media. Contributors. Conerly Casey, Jenny Chio, Michelle Cho, Kay Dickinson, Bishnupriya Ghosh, Feng-Mei Heberer, Tzu-hui Celina Hung, Rahul Mukherjee, Joshua Neves, Bhaskar Sarkar, Nishant Shah, Abhigyan Singh, SV Srinivas, Marc Steinberg, Chia-chi Wu, Patricia Zimmerman

This report discusses research, guidance, and outreach efforts in computer security, and collaborative activities with industry, government, and academic organizations. Phone managers are non-forensic software tools designed to carry out a range of tasks for the user, such as reading and updating the contents of a phone, using one or more of the communications protocols supported by the phone. Phone managers are sometimes used by forensic investigators to recover data from a cell phone when no suitable forensic tool is available. While precautions can be taken to preserve the integrity of data on a

cell phone, inherent risks exist. Applying a forensic filter to phone manager protocol exchanges with a device is proposed as a means to reduce risk.

La télémédecine ou la e-santé regroupent un ensemble d ' applications des technologies de l ' information et de la communication, lesquelles sont traitées dans cet ouvrage en partant d ' idées simples. Cet ouvrage place le patient au cœur du système. La santé est vue sous cet angle à travers la multitude des technologies disponibles actuellement. L ' acceptabilité de ces technologies par le patient, l ' aidant et le professionnel de soin devient alors un élément clé. L ' auteur liste les différentes applications ainsi que les briques matérielles et logicielles indispensables à leur réalisation. Quelques éléments de prospective complètent les évolutions récentes, comme le partage entre l ' hôpital et les nouveaux lieux de soins tel le domicile du patient. L ' ouvrage analyse les contraintes liées à la mise en place de ces dispositifs, en particulier les normes et certifications nécessaires, puis il aborde les différentes formations mises en œuvre au service du déploiement de ces solutions.

Gerard Goggin has produced an incisive and penetrating overview of the world according to mobiles. Covering sight, sound and status, plus a host of other issues, he provides a provocative analysis of how mobile communication gadgets come to play such a prominent role in our lives. Any scholar of New Media will want to read this book – James Katz, Department of Communication, Rutgers University, USA With billions of users worldwide, the cell phone is not only a successful communications technology; it is also key to the future of media. Global Mobile Media offers an overview of the complex topic of mobile media, looking at the emerging industry structures, new media economies, mobile media cultures and network politics of cell phones as they move centre-stage in media industries. The development, adoption and significance of cell phones for society and culture have been registered in a growing body of work. Where existing books have focused on communication, and on the social and cultural aspects of mobile media, Global Mobile Media looks at the media dimensions. Goggin provides a pioneering yet measured evaluation of how cell phone corporations, media interests, users and policy makers are together shaping a new media dispensation. Global Mobile Media successfully places new mobile media historically, socially and culturally in a wider field of portable media technologies through extensive case studies, including: the rise of smartphones, with a detailed discussion of the Apple iPhone and how it has catalysed a new phase in convergent media, audiences and innovation the new agenda in cultural politics and media policy, featuring topics such as iPhone apps and control, mobile commons, and open mobile networks a succinct map of the political economy of mobile media, identifying key players, patterns of ownership and control, institutions, and issues a critical account of cell phones ' involvement in and contribution to much-discussed new forms of production and consumption, such as user-generated content, p2p networks, open and free source software networks an anatomy of how cell phones relate to other online media, particularly the Internet and wireless technologies. Global Mobile Media is an engaging, accessible text which will be of immense interest to upper-level undergraduates, postgraduates and researchers in Communication Studies, Cultural Studies and Media Studies, as well as those taking New Media courses.
