In *The Emotional Toolbox*, Dr. Bochner provides a fresh and accessible perspective on the most common issues of psychotherapy and mental health. This book is a *Manual for Mental Health* and is organized as an owners manual for the relational world, which Dr. Bochner calls the great life machine. Unlike other manuals that focus on all brand-new systems functioning perfectly, however, *The Emotional Toolbox* recognizes the various types of likely breakdown that occur over time and focuses intently on helping you bring yourself to full potential. In essence, *The Emotional Toolbox* is the *Introduction to Psychology* people truly want and need, even though it does not include the typical Psych 101 articles on rats in mazes, pellet-pecking pigeons, cat-zapping contraptions, or old tired theories no longer useful in modern day psychotherapy. Instead, in this *Manual* the reader finds and feasts on expert knowledge regarding the intricacies of human interaction, the vagaries of couple and family life, and the ins and outs of mental health diagnosis. Dr. Bochner's *Emotional Toolbox* addresses the most commonly encountered issues of life, explains emotional difficulties and interpersonal communication at a level where the reader can feel personally understood, and offers solutions and redemption where people struggle most.

Argues that Indian cinema's deep nineteenth-century past continues to play a vital role in its twenty-first-century present. In *A Very Old Machine*, Sudhir Mahadevan shows how Indian cinema's many origins in the technologies and practices of the nineteenth century continue to play a vital and broad function in its twenty-first-century present. He proposes that there has never been a singular cinema in India; rather, Indian cinema has been a multifaceted phenomenon that was (and is) understood, experienced, and present in everyday life in myriad ways. Employing methods of media archaeology, close textual analysis, archival research, and cultural theory, Mahadevan digs into the history of photography, print media, practices of piracy and showmanship, and contemporary everyday imaginations of the cinema to offer an understanding of how the cinema came to be such a dominant force of culture in India. The result is an open-ended and innovative account of Indian cinema's many origins. Sudhir Mahadevan's *A Very Old Machine* is a work of great theoretical sophistication and rigorous historical scholarship. A revisionist and definitive treatment of early Indian film, the book shows how prevailing attitudes toward technology, photography, empire, commodity, and mass culture made the cinema a socially and culturally distinct form in India. Drawing on a wealth of primary research, *A Very Old Machine* fills many gaps. Anyone who wants to know how Indian cinema became Indian will need to consult this book. James Morrison, editor of *Hollywood Reborn: Movie Stars of the 1970s*
