Mini (R50-R53) buyer's guide: what to pay and what to look...

Mini 1st generation (R50-R52-R53) specifications: versions & types. Mini model 1st generation (R50-R52-R53) belongs to subcompact / supermini class. Represents the "B (small cars, city cars)" market segment. The car was offered with 3-door hatchback, convertible body shapes between the years 2001 and 2008.

Mini 1gen (R50-R53) data and specifications catalogue

The engine consists of different components, and the weight of the engine depends largely on the type of car. For a small car, you would expect an engine weight of 150kg/330 pounds, while a large V8 diesel can weigh over 350kg/771 pounds. These weights are minus the transmission, which can push the engine weight of the car down to about 600 pounds.

R53 Engine Weight — us-ny23-vpnunlimitedapp.com

• Mini R53. One of the most overseen engines to tune could be the BMW / Mini R53 engine. But still, there is a growing market, turning the small cars into lightweight track day rides. An easy way to make it possible to tune the R53 engine is to convert it to E85 from petrol and in order to do this, you need an ethanol safe fuel system.

Light weight belt on motorsport fuel roll for MINI R53 engine

In terms of straight-line performance, however, the newer model felt in a different league, even if the official figures of 175hp and 177lb ft (or 192lb ft on overboost) were not so different on...
