First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

2 book set. Vol 1: general spec data, engine tuning, torque settings, lubricants, fluids, maintenance. Vol 2: manual gearbox & transfer box, propeller shafts, front/rear axle, differentials, steering, suspension, brakes, body, heating, electric.
