This volume brings together archeologists, art historians, philologists, literary scholars, political scientists, and historians to articulate the ways in which western Greek theater was distinct from that of the Greek mainland and, at the same time, to investigate how the two traditions interacted. The chapters intersect and build on each other in their pursuit of a number of shared questions and themes: the place of theater in the cultural life of Sicilian and South Italian 'colonial cities;' theater as a method of cultural self-identification; shared mythological themes in performance texts and theatrical vase-painting; and the reflection and analysis of Sicilian and South Italian theater in

the work of Athenian philosophers and playwrights. Together, the essays explore central problems in the study of western Greek theater. By gathering a number of different perspectives and methods, this volume offers the first wide-ranging examination of this hitherto neglected history.

If you are responsible for the management of an intelligence enterprise operation and its timely and accurate delivery of reliable intelligence to key decision-makers, this book is must reading. It is the first easy-to-understand, system-level book that specifically applies knowledge management principles, practices and technologies to the intelligence domain. The book describes the essential principles of intelligence, from collection, processing and analysis, to dissemination for both national intelligence and business applications.

This third edition of the classic on the thermochemical aspects of the combustion of propellants and explosives is completely revised and updated and now includes a section on green propellants and offers an up-to-date view of the thermochemical aspects of combustion and corresponding applications. Clearly structured, the first half of the book presents an introduction to pyrodynamics, describing fundamental aspects of the combustion of energetic materials, while the second part highlights applications of energetic materials, such as propellants, explosives and pyrolants, with a focus on the phenomena occurring in rocket motors. Finally, an appendix gives a brief overview of the fundamentals of aerodynamics and heat transfer, which is a prerequisite for the study of pyrodynamics. A detailed reference for readers interested in rocketry or explosives technology.

Contains contributions from nine distinguished demographers and statisticians who examine population trends in the Pacific Islands and advise on action that needs to be taken urgently to prevent catastrophic social and economic consequences. Referenced.

The book provides an overview of current trends in biotechnology and medicinal plant sciences. The work includes detailed chapters on various advance biotechnological tools involved in production of phytoactive compounds of medicinal significance. Some recent and novel research studies on therapeutic applications of different medicinal plants from various geographical regions of the world have also been included. These studies report the antimicrobial activity of various natural plant products against various pathogenic microbial strains. Informative chapters on recent emerging applications of plant products such as source for nutraceuticals and vaccines have been integrated to cover latest advances in the field. This book also explores the conservation aspect of medicinal plants. Thus, chapters having comprehensively compiled in vitro conservation protocols for various commercially important rare, threatened and endangered medicinal plants were provided in the present book.
