An Egyptian Bedtime Story--The Shipwrecked Sailor

Tamara Bower's book, The Shipwrecked Sailor, provides delightful and instructive insight into the ancient Egyptian's imagination, as expressed in their literature and art. With hieroglyphs aptly translated by Melinda Hartwig, both children and adults will find this an entertaining, instructive, but above all beautiful book, a window on the Egyptian imagination that few other books of this genre can equal.

This story is based on one found on a papyrus scroll of hieroglyphs from the nineteenth century B.C., Egypt. It tells the tale of a voyage on the Red Sea to a mysterious and enchanted land of riches located south of Egypt. On his way to the King's gold mines, a sailor is shipwrecked on a magic island, the Island of the Soul. Not long after he arrives, a gigantic serpent with scales of gold appears and reveals to the sailor that he is the Prince of Punt, and is also a lone survivor. The two become good friends, but one day a ship comes to rescue the sailor. Bearing gifts from the Prince, the sailor returns to Egypt with full hands, and a full heart. This is a tale of the surprising (and fortuitous) bonds that unite us, and of the good that comes to us when we least expect it. Tamara Bower's lush illustrations are rendered in Egyptian style, and phrases from the story appear in hieroglyphs with their literal translations.

This volume provides original texts as well as translations of the major works of Middle Kingdom literature.

AVAILABLE FOR THE FIRST TIME IN eBook! In 1955, Garcia Marquez was working for El Espectador, a newspaper in Bogota, when in February of that year eight crew members of the Caldas, a Colombian destroyer, were washed overboard and disappeared. Ten days later one of them turned up, barely alive, on a deserted beach in northern Colombia. This book, which originally appeared as a series of newspaper articles, is Garcia Marquez's account of that sailor's ordeal. Translated by Randolph Hogan.

A charming picture book for the young Egyptologist with hieroglyphs and explanation in addition to lively illustrations

The Tale of the Shipwrecked Sailor is the earliest known surviving story of a shipwrecked sailor, and as such is the forerunner of many stories of nautical adventure encountering strange magical creatures, from Homer's Odyssey to Sinbad the Sailor. In a broader sense, it is generally considered the oldest piece of Egyptian fiction to survive to the present. Only one copy has been found to date, a single papyrus manuscript which resides as the Hermitage Museum in St. Petersburg, Russia, and is designated phermitage 1115. The exact origin of the papyrus was not properly documented at the time, which was common of early Egyptologists, however, it was most likely recovered in Vladimir Golenishchev's 1884-85 expedition to the Wadi Hammamat, which was the major trade route between the Nile in southern Egypt and the port of El Qoseir on the Red Sea. The papyrus does appear to be complete, however, the story is not. It begins abruptly, and ends abruptly, and suggests that it was excised from an older text. The story begins as a ship's captain is returning home from Nubia, on a failed mission of some kind, and then segues to the narrator telling the disinterested captain of a time when was shipwrecked on an island near Punt. It ends as abruptly as it begins, but the scribe confirms that this is the end of the story. Based on the content, it appears that the point of the papyrus was to copy the section of text dealing with the island and the 'Lord of Punt,' which was copied from a longer text in which the captain returned from his failed mission in Nubia, and told the king a story his crewman had told him to make up for the fact that he had nothing to report, but also downplayed the fantastic story by making it clear that it was his boring crewman's story, and not his. The reason for the extraction of the story, was probably because at the time, in the early Middle Kingdom era, the Egyptians were re-exploring their world, and trying to find the lands their ancestors had been trading with. This short work of probable fiction was, nevertheless, about the fabled land of Punt, which the Middle Kingdom reopened trade with in the 11th dynasty. Under the 11th dynasty's Mentuhotep III, an officer named Hannu reopened trade with Punt, however, it is unknown if he personally sailed there or simply organized the expedition. The most probable time for Imenyas pen-Imeny to have excised the story was before that first mission of Hannu, when the Egyptians were scouring their records for information on Punt. The fact that it was abandoned in the Wadi Hammamat, the route taken from the capital at Thebes to the Red Sea port of El Qoseir, seems to be a pretty strong indicator that the navigator did not see any value in the text, and did not even bother carrying it all the way to the harbor.

'Man perishes; his corpse turns to dust; all his relatives pass away. But writings make him remembered.' The fascination Ancient Egypt holds in our minds has many sources, but at the heart of it lie hieroglyphics. This extraordinary writing system was for many years seen as the ultimate challenge and puzzle before finally being cracked in the 1820s. Preserved carved in stone or inked on papyri, hieroglyphic writings give a unique insight into an awe-inspiring but also deeply mysterious culture. Toby Wilkinson has translated a rich selection of pieces, ranging from accounts of battles to hymns to stories to royal proclamations. This book is both very enjoyable and an essential resource for anyone wanting to study one of humankind's great civilizations.
