“ A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation. ” —Professor Charles Ogletree, Harvard Law School “ Provides important context for an important moment in America ’ s history. ” —Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “ Little Rock Nine, ” as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

A reference handbook for people with von Hippel-Lindau, their families, and their medical team. Updated 2015. The VHL Handbook is a summary of information essential to managing the health of a person with von Hippel-Lindau disease (VHL). Designed to be read by patients, their physicians and members of their health care teams, it explains how VHL occurs, how to monitor and test for possible medical issues, and common treatment options to be considered. VHL is a cancer syndrome, in which tumors may occur in one or more of six different organ systems. The tumors of VHL occur also in the general population, but for people who may experience multiple tumors in the same organ, special attention is required to keep organs healthy throughout the patient's lifetime, while avoiding the worst consequences of cancer. With early detection and careful management, there is more hope today for people with VHL than ever before. This book is designed to foster constructive teamwork among the patient, family, and the various health care professionals who will be involved in care.
