Greenmantle is the second of John Buchan's novels to feature Richard Hannay, a Scottish intelligence office in the British army, and as such is the sequel to The Thirty-Nine Steps. The book gives the account of Hannay and his associate's separate journeys through war-torn Europe to Constantinople to thwart an uprising that is poised to throw the Middle East, India, and North Africa into disarray, changing the course of the war. The book was popular when first published and although it has never been made into a film, the director Alfred Hitchcock was said to prefer Greenmantle to The Thirty-Nine Steps, and considered filming it on several occasions. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Dubliners is a collection of picturesque short stories that paint a portrait of life in middle-class Dublin in the early 20th century. Joyce, a Dublin native, was careful to use actual locations and settings in the city, as well as language and slang in use at the time, to make the stories directly relatable to those who lived there. The collection had a rocky publication history, with the stories being initially rejected over eighteen times before being provisionally accepted by a publisher—then later rejected again, multiple times. It took Joyce nine years to finally see his stories in print, but not before seeing a printer burn all but one copy of the proofs. Today Dubliners survives as a rich example of not just literary excellence, but of what everyday life was like for average Dubliners in their day. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

A powerful nineteenth-century French classic depicting the moral degeneration of a weak-willed woman

H.G. Wells, the author, has been called the father of science fiction. 'The Time Machine' is one of his most notable science fictions. It's a Time Traveller's journey into the future. He explains that there are really four dimensions, three of which we call the three planes of the Space, and a fourth, Time. Also, there is no difference between Time and any of the three dimensions of Space except that our consciousness moves along it. The book narrates how the Time Traveller plans for a machine to travel through time and disappear. Comparison between the present time and future time. Like as, the air is free from gnats, the earth from weeds or fungi; everywhere were fruits and sweet and delightful flowers; brilliant butterflies fly hither and thither. The ideal of preventive medicine is attained. Diseases are stamped out. No contagious diseases. Even social triumphs too is effected. Like as, the mankind is housed in splendid shelters, gloriously clothed, and as yet are not engaged in toil. No signs of struggle, neither social nor economical. The population is also ceased to increase. No one can predict anything about the future Time. This book seems very interesting, in this way. Solves many queries raised by the various characters in the book with the Time Traveller. The author has written his best to enthrall the readers. Many future films and Television Series are made on "The Time Machine", which has in turn inspired to write new books on the topic of "The Time Machine".

A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes, we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

Though some critics have dismissed The Excursion as one of Wordsworth's weaker works, Wordsworth himself thought of it as one of his best. Like Peter Bell, The Excursion deals with a Wanderer who gathers stories throughout his travels.
